DISRUPTIVE TECHNOLOGIES IN DISRUPTED TIMES

Join CDW and some of the industry's key technology speakers on Thursday 1st March 2018 at the iconic Victorian Bath House, for an exclusive fireside chat in sumptuous surroundings, where old style exuberance meets modern sophistication.

Where better to spark debate surrounding the challenges of disruptive times and disruptive technologies, including GDPR, data breaches, and the impact of Brexit for UK and international organisations.

About The Speakers

Clive Myrie – BBC News Presenter
Clive Myrie is a multi-award winning journalist, one of the BBC's most experienced foreign correspondents and a recognised face as a BBC News presenter. Clive studied law at the University of Sussex then gained a place on the BBC's prestigious journalism trainee scheme in 1988, starting in local radio and progressing through the ranks from regional television to network TV and radio reporting in 1992. He has held some of the most important posts in foreign newsgathering including Washington, Europe, Asia and Africa Correspondents. Clive has won awards in Monte Carlo and citations in both the US and UK.

Neil Trevains – Solutions Architect, UKI Data Centre Practice, Cisco
Neil has a wealth of knowledge and experience that provides him with great insight into how a CTO thinks about investing ian new technologies. Prior to joining Cisco in 2015, Neil was a director a Firefly where he delivered enablement courses focused around Cisco's data centre portfolio. Prior to that, he was CTO for two financial services businesses in the City of London for 8 years, and was responsible for both application development and infrastructure engineering – in fact, all things IT-related!

Alex McMullan – VP & CTO for EMEA Pure Storage
Alex achieved Bachelors and Masters Engineering degrees at Liverpool University. He started by writing flight/test software at British Aerospace before moving into infrastructure design and implementation at Ingress. Alex transitioned into professional services at Sun and VERITAS with numerous assignments designing and implementing large scale UNIX and storage systems in financial services. Alex then joined UBS Investment Bank to manage the storage and distributed computing infrastructure. He then moved to Barclays to run the storage, database and data warehouse engineering divisions and spent 6 years there before joining the Pure Storage team in 2014 where he holds the role of EMEA CTO.

Filip Verloy – Rubrik EMEA Technical Marketing Engineer
Filip is a Technical Marketing Engineer at Rubrik and has previously worked for organisations such as VMware, Riverbed, Nuage Networks, Dell, Citrix, and several VAR's. He is a very passionate technologist having a particular interest in everything software defined as his background lies in infrastructure i.e. storage, networking, virtualization, and automation. Filip was awarded vExpert in 2014 right through until 2017 and holds an impressive collection of industry certifications.
