ServiceWorks for Health

N3 Cloud Services from CDW

Digital healthcare heralds a new era for the NHS, one many providers are not prepared to meet. Overhauling paper-based processes and tackling the volume of digital information being created will put pressure on, and likely overwhelm, most on-premise infrastructures. Against a backdrop of government reform, budget cuts and new initiatives to drive improved information exchange, the cloud offers the chance to access valuable IT resources within a model of cost-reduction and technology simplification.

The government has acknowledged the transformational potential offered by the cloud, mandating a 'cloud first' strategy, wherever possible. Determining how to respond to this with a co-ordinated and strategic approach is essential.

Introducing ServiceWorks

ServiceWorks is CDW's cloud services business. Underpinned by a long-established managed platform and powered by three world-class datacentres, we specialise in moving business critical IT services to the cloud; Enabling healthcare IT teams to shake off the burden of infrastructure management and migration of legacy systems to focus on how they better support patient care.

Our platform has been built from the ground up, using only the very best technology components to create a world class platform from which to deliver your IT services. Importantly, it is live and ready for use today – not built on demand - allowing us to commit to accurate costs, even though every customer requirement is unique.

Working alongside many of the world's leading technology vendors we have also integrated various complementary cloud services with our own core products. Together this creates best-of-breed solutions.

Need to know

ServiceWorks is CDW's cloud services business. Delivered from a premium platform and powered by world-class, N3-connected data centres it offers healthcare providers the opportunity to move any workload into the cloud.

Benefits

- Focus on patient care and innovation not infrastructure management

- A platform up to critical life and death situations

- Grow into our cloud at your own pace

- Respond to new initiatives faster

Awards and Partnerships

Why use ServiceWorks for Health?

Focus on patient care
Let experts deal with managing your infrastructure, so internal IT teams can focus on clinically relevant services that support patient care.

Accelerate response to new initiatives
Avoid substantial upfront investments in technology attempting to respond to new government initiatives or mandates and stand–up services quickly, by avoiding long procurement cycles and technical dependencies.

Hybrid cloud
Through our N3 connectivity we also have the ability to deliver managed services for managing on–premise infrastructure where organisations seek a hybrid approach to cloud.

In capable hands
We hold the highest accreditations, with a stable of leading vendors including VMware, HP, EMC, VCE and Cisco and we have won numerous awards for our expertise working with these technologies. ServiceWorks is truly managed by a team of experts.

Move any service and Mitigate Risk
Migrate mainstream services to clinical applications and electronic patient records. Whether you want to move your entire on–premise environment, or are embarking on a new service, moving to ServiceWorks provides rock–solid peace of mind that your systems will be underpinned by the highest levels of security and resilience.

Systems up to life or death situations
Our platform is built for business critical workloads – workloads that don't come more critical than clinical systems.

Be cloud compliant

Straightforward to deliver – we can stand up services in minutes, or discover and migrate full IT environments within just a few weeks, providing the perfect foundation to begin transforming the way IT supports your organisation. Complete transparency, the result of real–time performance metrics delivered via our user–friendly portal also means working with ServiceWorks and managing consumption is effortless.

ServiceWorks is connected to the N3 Network, offering a high–bandwidth, resilient and secure means of exchanging patient identifiable data. Having achieved the Information Governance Statement of Compliance (IGSoC) we provide the highest safeguards surrounding information assets that may be accessed through our platform. CDW is also part of the G-Cloud initiative, enabling healthcare providers to easily access our services through the government CloudStore.

Why ServiceWorks?

ServiceWorks is CDW's cloud services portfolio. We have a long heritage specialising in the delivery of business critical IT through the cloud. We make moving IT to the cloud fast and simple, through a premium, ready–made platform, relevant and flexible commercial terms and user friendly tools that enable usage to be managed in real-time. This offers the freedom to embrace the cloud at your own pace, and take advantage of all the economies it has to offer.
