- 11.45 Securing your connection to the cloud by Century Link
- 12.00 Panel – CDW, Zerto and Century Link
- 12.15 Networking Lunch

Whether you plan to deploy your cloud on premise, access public cloud, or use a service provider cloud, CDW offers the right fit for your organisation. With UK Data Centres, CDW is at the leading edge of Data Centre and Cloud integration technologies and boasts strong relationships and expertise across industry leading partners.

CDW's team of experts, in partnership with Zerto and Century Link, invite you to our exclusive event where we will provide valuable insight into the immediate future of cloud and the benefits this can bring to your business. Whether you are only just embarking towards server and storage consolidation using virtualisation, or actually reaching the initial stages of a mature hybrid environment, this event will allow you to share in our experiences, and will take you along our journey from service inception to where we stand today.

We will also be joined by clients who are using the ServiceWorks platform, contributing their individual stories from first engagement with CDW, to service go live and beyond. If you are interested in simplifying technical operations in order to focus more on your core business, then take the opportunity to engage in thought leadership debate and join CDW at this exclusive event.

Places are limited so please contact your Account Manager today, or click on the button below to register.
